Student

SUMMARY

I am a degree apprentice at IBM, currently studying the Digital and Technology Solutions course. I developed a passion for programming in Year 7, 2014 and have continued growing my skills ever since.

EXPERIENCE

Q2 2020 -

alwaysAI Bot

- Lead-developed a Discord bot for the company alwaysAI
- Programmed, tested, conversed with client
- Bot features: run alwaysAI's deep vision models on images, view model information, view documentation
- [Blog post](#) about the bot published by alwaysAI
- [GitHub repository](#) for the bot

Outcome - Product successfully delivered on time with all discussed features. Provided rich learning experience for how to expand on future projects

Q4 2020

Young Professionals Work Experience

- Actively contributed in tech-based webinars by global companies including; EY, PwC, Vodafone, HSBC, CGI and many others
- Got involved in conversations, discussions and workshops delivered by the company leaders
- Learnt how to network, build confidence in the work place and achieve an overall better understanding of the working world
- Developed my commercial awareness and being exposed to new and innovative technologies such as AI, robotics and IoT
- Deepened my understanding of how technology is going to impact the future of work and the rapidly evolving GIG economy

Outcome - Successfully developed skills in networking, workshop participation and client conversations along with a deeper technical understanding of future economies

Q3 2018

NHS Work Experience

- Observed somebody work at the NELFT (NHS) podiatry service in Redbridge and Waltham Forest over the course of a week in Year 10
- Voluntarily took up the opportunity to solve a problem they experienced with their rotas when booking clinical rooms
- Overhauled their entire excel rota and made a macro to alert them when they overbooked

Outcome - Product was successful and has had a deep impact at the NELFT podiatry service; the rota system is still being used years later

Q3 2018

Debden Park Open Day Volunteering

- Supported my schools open day in the Computer Science section by request of my Computer Science teacher
- Actively answered questions from visiting parents and set up activities on the computers

Outcome – Helped influence the student intake for the year as several of the prospective students I spoke with became successful candidates at the school

ADDITIONAL EXPERIENCE

- Q4 2018 - Present
- Gunpowder Park Run Volunteering**
- Regularly volunteered at the weekly local park run
 - Undertook various roles: Barcode Scanning, Finish Tokens, Timekeeper, Token Sorting, Tail Walker, Post-event close down
 - My [volunteering summary](#)

Outcome - Helped deliver successful events - one being over subscribed - with lots of feedback from the community on how successful the events had been

- Q4 2017 - Q3 2018, Q1 2020
- Mentoring**
- Volunteered as a reading mentor for a Year 7 student who struggled with reading
 - Gave guidance on how they could improve based on their performance

- Mentored a GCSE student who struggled with maths while in Year 12
- Creating hour lessons tailored towards resolving gaps in their knowledge and revisited old gaps to make sure that the student continued to revise them.

Outcome - Received positive feedback from the students I mentored; they commented on how their abilities and confidence levels had improved

PERSONAL PROJECTS

- Q1 2020 - Q2 2021
- Remote Controlled Camera**
- Made a remote controlled camera for my A-level CS coursework
 - Uses an Android App to control a camera on a multi-axis servo mount linked up to a Raspberry Pi 4B
 - [GitHub repository](#) collating the entire project

Outcome - The project was successful and received maximum marks

- Q2 2020 - Q3 2020
- Quote Bot**
- Created a Discord bot that takes a random message's content from a specified channel and reposts that content with text formatting
 - [GitHub repository](#) for the bot

Outcome - The project was delivered successfully with a small, but growing, user base

EDUCATION

A Levels, Debden Park Sixth Form, 2019-2021

- Computer Science - A*
- Further Maths - A
- Maths—B

AS Levels, Debden Park Sixth Form, 2020

- Further Maths - B

GCSEs, Debden Park High School, 2014-2019

- Maths - 9
- Computer Science - 8
- Physics - 8
- Biology - 8
- Chemistry - 7
- Geography - 6
- English Literature - 6
- English Language - 5
