

EXPERIENCE

- Q3 2024 – Present

IBM Technical Consultant – Full Time

 - Primarily a Backend Java Developer working on Customs Declaration Service (CDS), a technical migration that acts as a replacement for CHIEF with functionality to support modern legislation, for HMRC.
 - Acted as a Technical Lead for a group of Developers & QAs.
 - Responsible for leading the team to develop, and actively developing myself, critical features for multiple components.
 - Continually determined non-functional scope for overhauling a 7 year old multi-application codebase to support integration of a new component.
 - Became an SME for a large multi-component codebase.
 - Performed numerous code reviews for members of the team.
 - Primarily responsible for framework & Java version upgrades.
 - Supported & contributed to various architectural design discussions.
 - Co-ordinated changes between two release streams.
 - Aided numerous members of the team every day with issues (e.g. IDE related, component build) or technical queries.
 - Actively involved in a number of innovative PoCs for overhauls & new components.
 - Actively upskilled members of the team with technical knowledge.
 - Involved in various critical live service investigations from a technical perspective.
 - Developed a range of differing Python scripts to support various development activities.
- Q3 2021 – Q3 2024

IBM Technical Consultant – Degree Apprenticeship

 - Initially joined as a Performance tester on the Customs Declaration Service for HMRC, and later migrated into a Backend Java Developer role.
 - Actively learnt Java, EJB, and Spring Boot during my performance testing role to enable this migration
 - Overhauled the performance teams JMeter test scripts for significantly maintainability.
 - Developed & continually maintained & improved an innovative Bash-driven setup tooling to support team members and reduce friction when onboarding & setting up components.
 - Achieved a First Class Honours Degree in Digital & Technology Solutions (Software Engineer) and a Distinction in my Level 6 Apprenticeship.

VOLUNTEERING

- Q3 2018 Q3 2025

NHS Podiatry

 - 2018 Work Experience
 - Observed a family member working at NEFLT (NHS) podiatry service in Redbridge and Waltham Forest during a week.
 - Voluntarily overhauled their existing Excel Rota to raise an alert when overbooking clinics to prevent double bookings.
 - 2025
 - Voluntarily overhauled the rota again over a weekend to include new clinics, easier maintainability for non-technical people, monthly calendar, and a visually redesign from UX/UI learnings
- Q4 2018 – Q1 2020

alwaysAI Bot Development

 - Lead developer for the creation of a Discord bot for alwaysAI.
 - Hosted exploratory workshop sessions with the client to identify requirements.
 - Bot features included running alwaysAI's deep vision models and viewing model information & documentation within Discord.
 - 2025
 - [Archived Blog Post](#) about the bot, published by alwaysAI.
 - [Forked GitHub repository](#) for the bot.

SUMMARY

A Technical Consultant with a strong ambition for programming, who strives to constantly upskill. Proactively proposes and implements innovative ideas to reduce friction for team members during development, and frequently enables others by sharing knowledge wherever possible.

TECHNICAL SKILLS

- Languages:
- Java
 - TypeScript/JavaScript
 - Python
 - Bash
 - Kotlin

- Frameworks:
- Spring Boot
 - Vite
 - Enterprise Java Beans
 - React
 - JavaFX
 - Tkinter

- Other:
- Transactional Systems
 - Message Brokers: IBM MQ, RabbitMQ, Kafka
 - Docker/Podman
 - Maven/Gradle
 - SQL Databases: Oracle, Postgres, SQLite
 - Git
 - Unit Testing: JUnit, Vitest
 - JMeter
 - REST APIs
 - Jupyter

PERSONAL PROJECTS

- Q1 2021 – Present

Terminal Site

 - Created a UNIX Terminal website that acted as an interactive version of this CV.
 - V1.0 used pure JS/HTML/CSS and ran on a NodeJS server via a DigitalOcean Droplet.
 - V2.0 was a full rewrite to a static site using TypeScript & Vite - and backed with a Vitest & Playwright test suite - that ran via CloudFlare Pages.
 - Included significant performance enhancements, browser stability, and a range of new functionality.
 - [GitHub repository](#) for the project.
 - Accessible via <https://nathanwise.software/>, <https://nathanwise.tech/>, or <https://nathanwise.dev/>
- Q1 2020 - Q2 2021

Remote Controlled Camera

 - Created a remote controlled camera for my A-Level CS coursework.
 - Uses an Android App to control a camera mounted to a multi-axis servo which is linked to a Raspberry Pi 4B.
 - Utilises a Flask server for communication between the Android App and Raspberry Pi.
 - [GitHub repository](#) collating the entire project.
- Q1 2024

Sprite Bot Battle Command

 - Developed a command for previewing sprites that would appear in battles within Pokémon Infinite Fusion to aid Spriters.
 - Shadow support & final clean up was performed by the main bot Contributor due to university commitments on my end.
 - Supported a massive user-base with a PR that took a weekend; the command sees high consistent daily usage.
 - [Pull Request](#) for the command.
 - [GitHub repository](#) for the bot.
- Q1 2022

Style Handler

 - Conceptualised and developed a Tkinter styling library due to limitations with the TTK Style System.
 - Uploaded the library to [PyPi](#) to allow other people to utilise it in their own projects.
 - [GitHub repository](#) for the library.

EDUCATION

- University of Winchester

 - First Class Honours, BSc. Digital & Technology Solutions (Software Engineer)
- Institute for Apprenticeships & Technical Education

 - Distinction, Digital and Technology Solutions Professional (Integrated Degree) (Software Engineer): Level 6
- Debden Park Sixth Form, A-Levels

 - Computer Science - A*
 - Further Maths - A
 - Maths - B
- Debden Park Sixth Form, AS-Levels

 - Further Maths - B
- Debden Park High School, GCSES

 - Maths - 9
 - Computer Science - 8
 - Physics - 8
 - Biology - 8
 - Chemistry - 7
 - Geography - 6
 - English Literature - 6
 - English Language - 5
