

A Technical Consultant with a strong ambition for programming, who strives to constantly upskill. Proactively proposes and implements innovative ideas to reduce friction for team members during development, and frequently enables others by sharing knowledge wherever possible.

EXPERIENCE

- Q3 2024 - Present

IBM Technical Consultant—Full Time
 - Primarily a Backend Java Developer on the Customs Declaration Service for HMRC.
 - Acted as a Technical Lead for a group of Developers & QAs with ownership for numerous critical features.
 - Supported & contributed to various architectural design discussions for features.
- Q3 2021 - Q3 2024

IBM Technical Consultant—Degree Apprenticeship
 - Initially joined as a Performance tester on the Customs Declaration Service for HMRC, and later migrated into a Backend Java Developer role.
 - Developed & maintained innovative technical tooling to support team members and reduce friction.
 - Achieved a First Class Honours Degree in Digital & Technology Solutions (Software Engineer) and a Distinction in my Level 6 Apprenticeship.

VOLUNTEERING

- Q2 2020 - Q3 2020

Voluntary alwaysAI Bot Development
 - Lead Developer for the development of a Discord bot for the company alwaysAI.
 - Hosted exploratory workshop sessions with the client to identify requirements.
 - Bot features include running alwaysAI’s deep vision models in Discord, viewing model information, and viewing documentation.
 - [Archived Blog post](#) about the bot published by alwaysAI.
 - [GitHub repository](#) for the bot.
- Q3 2018 - Q3 2025

NHS Podiatry
 - In 2018
 - Observed somebody work at the NELFT (NHS) podiatry service in Redbridge and Waltham Forest over the course of a week.
 - Voluntarily overhauled their Excel rota to raise an alert when overbooking clinics.
 - In 2025
 - Voluntarily overhauled the rota again to include new clinics, easier maintainability, and a functioning calendar.
- Q4 2018 - Q1 2020

Gunpowder Park Run Volunteering
 - Regularly volunteered at the weekly local Park Run, undertaking various roles such as: Barcode Scanning, Finish Tokens, Timekeeper, Token Sorting, Tail Walker, Post-event close down.
 - My [volunteering summary](#).

TECHNICAL SKILLS

- Languages:** Java, Python, TypeScript, Bash
- Frameworks:** Spring Boot, React, Enterprise Java Beans, Vite, JavaFX, Tkinter
- Other:** Transactional Systems, Message Brokers, Git, SQL Databases, Unit Testing with Mocks, REST APIs, Jupyter

PERSONAL PROJECTS

- Q1 2021 - Q1-2026

Terminal Site
 - Created Unix-like Terminal website that acts as an interactive version of this CV.
 - V1.0 used pure JS/HTML/CSS and ran on a NodeJS Server via a paid DigitalOcean Droplet.
 - V2.0 - a full rewrite - uses TypeScript with Vite and runs as a static site via CloudFlare Pages for free.
 - [GitHub repository](#) for the project.
 - Accessible via <https://nathanwise.software/> or <https://nathanwise.tech/>.
- Q1 2020 - Q2 2021

Remote Controlled Camera
 - Made a remote controlled camera for my A-level CS coursework.
 - Uses an Android App to control a camera on a multi-axis servo mount linked up to a Raspberry Pi 4B.
 - [GitHub repository](#) collating the entire project.
- Q1 2024

Sprite Bot Battle Command
 - Spent a weekend creating a command for previewing sprites that would appear in battles within Pokémon Infinite Fusion, mainly aiding Spriters with sprite alignment.
 - Managed to support a massive user-base with a PR that took minimal time investment; the command sees high consistent daily usage.
 - [Pull Request](#) for the bot.
 - [GitHub repository](#) for the bot.
- Q1 2022

Style Handler
 - Conceptualised and developed a Tkinter styling library due to limitations with the TTK Style System.
 - Uploaded the library to [PyPi](#) to allow other people to easily utilise it in their own projects.
 - [GitHub repository](#) for the library.

EDUCATION

- University of Winchester**
